Jeffrey

Confirming the direction you gave during your visit was to level the area at the back of the cabin, so guest would be able to turn around safely

Grade was to be taken from the Tree, Tree was to be kept if possible, estimate grade to be 1 - 2 feet above cabin foundation.

We where to use timbers and rock to retain back fill

Steps to be made of timber similar to existing on cabin

Are we to proceed with this direction?

photos for your reference

regards Brice
