Greetings Sir,

September 8 photos for your review and comments:

New Waterfall progress - the pit has been dug for the cistern

Big Salt Pond - Danny installed the trash pump this morning for the re-hydration

Pebble Beach cleanup - ongoing

Shoreline seaweed cleanup - 6 truckloads of seaweed were removed from the shoreline, but the ocean continues to bring in more

Main compound hillside - stone removal in progress, hydro-seeding starts tomorrow

Fiber pull from Gym to Blue Beach - Danny began to pull the fiber and ran into issues with unknown blockage - he is considering just running new conduit, as it is only 650 feet and can be completed in a day

MBR flooring progress - Pokey is now sanding - next will be caulking and finally the stain/polyurethane seal - we expect him to be completed by Monday 14 at the latest

Cabanas 1 and 2 showers - Danny E is almost complete with the installation - he was fortunately able to find the missing cartridge on STT

Gym Roof painting - TJ expects to be completed tomorrow - will ask him to also paint the roof of the Gym A/C shelter

Library Roof painting - Gary applying rust prevention, will paint after

Orange parasitic vines removed on plants below Library - landscaping will next remove the vines from the seagrasses below the Library on the beach

Respectfully submitted, Daphne
