It will take one day to do the boring test.
We will set up a 14 foot tall tripod in the middle of the backyard where there is currently one patio stone

I just spoke to the engineer and they could mobilize and do the soil boring test tomorrow which is Wednesday if that is acceptable.
Please let me know and I will confirm the schedule with them

Leighton,

I met with Nutting Engineers this afternoon at 358 El Brillo and discussed the location of the soil boring test and the damage it may cause to the site. It will be sand from the boring auger on a large tripod of which we will contain on tarps. We discussed this work in detail with Janusz and he informed us Mr. Epstein may be visiting this week so I scheduled the work for the following Wed.

I have contacted all of my subcontractors and we should have all the work quotes ready for you late tomorrow afternoon.

Thank you,

Dan

He told me the existing louvered shutters are not Miami Dade approved.

He said we could use armor screen rather than rigid shutters if you are interested in that option

Leighton

I just met with

All American windows and shutters, I asked him to provide alternate pricing with options along with pricing to replace the front and rear doors.

He will be sending us an itemized quote with a brochure of the products they're proposing to use.

They are the company that did the original shutters on the house 10 years ago.

Thank you

Dan
