Mr. Gordon,

I would enjoy the opportunity to visit this area and discuss the local geology to anyone interested. I am a fifth-year PhD student in Earth and Planetary Sciences at UNM and I study the field geology of northwestern New Mexico in the Cuba/Nageezi/Bloomfield area. I have 5 years' experience in teaching undergraduates field geology in sedimentary rocks similar to those exposed in the Galisteo Basin near this property, and I would be able to bring along geologic maps and reports on the area to share with anyone interested.

I am available this Wednesday, Friday, this weekend, or Monday through Thursday of next week. If those days are inconvenient, I'm happy to schedule a later visit, as well. I'm looking forward to the opportunity. Feel free to contact me at your convenience.

Regards,

Kevin Hobbs

To whom it may concern

I have client who has a large property, between Stanley and Galisteo, NM

He is very interested in having someone walk with him and describe the Geology of this unique property

Would anyone be interested in doing so and have availability this week or next.

I have attached a google screen shot of the property location and surrounding area for your reference.

regards

[REDACTED]
Stanley, NM
