Anna-

1) Cut out wasted plate under fuel tanks and behind fuel tanks, back grind, make templates for new plate fit up, tack, weld, and dye penetrant to insure no leaks. Labor.....\$11,910 (Originally \$14,410 but a discount was given as per our conversation with Anna Rodriguez.)

2) Materials: 70 Sq ft of 5086 marine grade aluminum plate, cut off wheels, grinding wheels, argon gas, mig wire, dye penetrant, and misc.....\$5750

Total.....\$17,600 (reduced from \$20,160 as per our conversation with Anna Rodriguez)

Anna like we discussed on the phone we need to know by today on how to proceed. We are not trying to create more work, no one would have ever known about this bad plate if the fuel tanks were not taken out to be replaced. Thank you.....
