Good Night All

Terrence and I along with the techs from TC Communication got the Fiber Extenders communicating with each other and the phone switch synced with the extender on LSJ. The network support (Mr. Warner) for innovative stated he is seeing a hard loop (the signal from Innovative is bouncing back at them and not being received by the extenders). They will send someone in the line department in the morning to check the DMark drop (it is in a locked case) and their equipment in the fiber cabinet at Cabrita Point. Terrence agreed to work the St. Thomas side and I will work the LSJ side to handle any changes if needed.

Regards  
Jruan

I'm calling them right now.

They may have messed with something in the process of fixing the phones.
