I thought this chart was a great example of what i have been telling you. // right pocket to left pocket. . the accounting for it is even stranger. . as it is an interest payment , they record income. ? if the interest rate is high, you would call it predatory lending. if it was low you would call it a bail out. all silly.

2 . the Chomsky questions? ..

3. Ehud agrees with a great deal of your views . disagrees with some observations of yours. has great respect for you.
