**Subject:** 3-15-18 LSJ VIYA Visit

Good Evening

The visit to LSJ by Dean Dennett of VIYA and Liston Thomas found that the current phone switch is not **SIP** ((Session Initiation Protocol) is a protocol used in VoIP communications allowing users to make voice and video calls, mostly for free) compliant. We will need a SIP ready system to had the Voice service, which Liston is will to loan JE.

Dean is advising for a direct fiber to fiber link with the VIYA point of termination on LSJ. This way as long as both LSJ and the ViYA Nazerth Substation have power LSJ will have phone service. But there are two areas that need to be address. The first, is the proper paper work need to be drafted for VIYA to manage our fiber. The second is VIYS lead lead time. Dean is waiting on start dates for lighting LSJ fiber.

Dean is onboard with the recommended stop Jap to temporarily. To use 2 of STC line to provide LSJ with service until VIYA can make their repairs.

Regards  
Jruan
