---

Kinda cool, but you are limited to installing a maximum of four (4) windows in the aircraft total.

My suspicion is that we can not install these windows next to each other (ex. In a bedroom or other relatively smaller defined space).

Further, depending on spacing, I question how the exterior aesthetics will be affected (visual relationship to entry door, wings, etc.?)

If you want to see something cool, I just saw the new BMW 7 series- they put motion sensors in the headliner that allows the driver to control certain audio functions (volume up/ volume down) by hand gesture. Very creative

Best regards,

Eric
