Subject: Cervical Cancer Research, Care, Education & Treatment in Northern Samar, Philippines

To: jeffrey@jeffreypstein.org

Dear Mr. Epstein,

There is a solution for cervical cancer treatment. "This research will lead to the development of low cost screening and treatment algorithms for cervical cancer. Importantly, it will also provide increased access to care for women in underserved parts of the United States and areas of the world where screening programs do not exist or do not reach the women most in need." according to Dr. Jerry Belinson. He is the Ex-officio chairman of the Department of OB/GYN at Cleveland Clinic Foundation from 1990-2000. He has developed advanced screening and treatment for this gynecologic cancer. He works with leading physicians and specialists. He has partnered with us to bring this specialized care and treatment where there is a great need.

Dr. Belinson (www.poiinc.org) and Florence Nightingale Global Health (www.fngh.org) are developing a program in Northern Samar, Philippines. We are seeking funding to start this program. We are seeking \$100,000 for this medical mission.

We are going in July 19-26, 2015 on an initial development with our partners in this region.

Would you consider assisting us in this vital program.

It is accomplishing a project that makes a lasting difference. It is accomplishing something to enrich other's lives.

Sincerely,

Florence Allbaugh, Pres.
Florence Nightingale Global Health
Globetrek Education, L3C
