Al quote is very vague but gives us outside parameters for cost and we can fine tune scope once we learn more from other vendors..

merwin and i are still waiting on quote from Apollo Electric to pull wires instead of Al also Merwin has reached out to two other vendors for quotes and ideas..

CAT6A versus CAT7 will have no effect on Wireless speeds. Maximum guaranteed WiFi speeds will be 350MHz with either cable. CAT6A is capable of 10GB on a wired network.

thank you for memo

concerned that it is to vague to send to mr epstein does not talk about cat 6 vs cat 7 measurements of wiring type of wireless

Hello Rich,

This is very basic but should get the point across.

Al
