I believe weather will improve for a midnight arrival Monday,.

It's tough to guesstimate weather system movement and accurately judge when weather will improve,. According to Wx charts we should be good to arrive after system passes NYC later Monday, I'll watch weather as my 18 hour forecast window changes for Teterboro, and keep you updated,.

I'll fuel and load luggage today on GIV,.

This is weather system we are waiting to pass for a Monday evening arrival, . Are arrive Sunday before system hits NYC
