Rich,

I'm concerned that Brice has jumped the gun in sending this to Jeffrey without getting the monthly service charge rates for a Verizon Wireless Business LTE connection.

It used to be that business cellular packages were used for firewalls to report when the primary internet connections went offline. Those services were usually ridiculously expensive compared to the consumer plans because carriers like to gorge small businesses whenever possible.

I'm worried that the boss is going to sign off on this, and we're going to end up committed to a package with very little data and a couple of thousand \$\$ a month charge.

Brice is laser focused on the device — the modem & antenna — which affects reliability, but we NEED to know the VZW packages before we buy hardware to use with them.

Also, I've told Brice on several occasions quite explicitly that there is NO advantage to tying this connection back into the Microwave T1 (phone and HVAC) network.

The only reason I suggested that to begin with was because it was something I could do remotely and avoid having him reconfigure the wireless network without me. He blew that when the trial service was setup without a static IP and I had to walk him through breaking the two networks apart.

There's NO reason to rejoin the networks now; we get NOTHING out of it, so we don't need a static ip for this connection.

attached estimate for Feeney Wireless, Skyus 4G modem and Antenna's

Equipment cost: \$1264.55

Installation cost: \$750.00

Static IP cost: \$500.00 (Verizon)

Total cost: \$2514.00

Antenna would be place out on Master Bedroom Terrace, Modem would be installed in storage closet in Master Suite

There is an existing run of Cat 5 from Master Suite storage closet to switch/router in basement, then to New Ranch Network

Service is Verizon 4G LTE, and would be billed to Business Account at Business service provision rates.

for your consideration

Brice

Update

New Microwave Pole

New 20 ft Pole and existing microwave dish install will be completed Tuesday next week weather dependent.

Will forward speed test results once link is back up and running

Verizon Home Fusion

Initial install was on mechanical building pole and with basic integration into network

Speed Test results, wireless connection, averaged thru out the MH and RC office computer.

download 11

upload 11

ping 131

Moved Antenna to Master Bedroom Terrace, connected laptop **directly to modem** outside on terrace.

Speed Test results

download 19.8
upload 16.4
ping 94

I'm presently in contact, thru Verizon Wireless Business Solutions , with Feeney Wireless regarding there Skyus 4G modem and Antenna's
Feeney Wireless is a Verizon business partner.
This equipment seems more robust than the residential Verizon modem and router.
Feeney Wirelss have indicated that service would still be Verizon 4G LTE on our business account.
I have request pricing for equipment and confirmation of service provision.
I should have this information next week and will forward when received to all parties

Please note Verizon have recently taken over Plateau Wireless and are now expanding there wireless service to this corridor.
I will be forwarding information regarding our tower location to there network people.
Again will let you know outcome.

regards
