Hello Richard,

I have attached a dump body brochure page so you can forward it to your superintendant in St. Thomas. This way he can pick which one will work best for their needs.

Here are some other questions that we should answer:

What length dump?

What height of the walls?

How much weight will you be putting into the dump?

These things will pretty much determine the best route for you.

Best regards,

**Tony Llitas**
