Bob

The Owner has directed me to have Advance communication reinstate the T1 service from Sandia crest so he can have reliable service for is visit
At this time we can not even upload small files

Brice

He is copied on this email.

As I discussed with your networking guy, the speed must be checked with our server directly from our router, he has the program to do this.

I will keep you informed,

Bob Hershberger

Engineer

Bob

Can you please call me [REDACTED]

The owner is not very happy with service to say the least.

Speed prior to dish re alignment 3 mbps down - .3 up and not constant

After dish alignment, 3.5 down and .3 up, this test was performed directly thru your router

I am of the understanding your engineering department are looking to improve this.

and probably will not be able to resolve this until Thursday

The owner is on the West coast and would like to stop in for several days with some very important guest.

Can delivery issue be resolved before then, I need to give owner update tonight
