Hello Richard,

Attached you will find a few versions of our 14 meters, COI 49 passenger Naiad water taxis.

Please let me know which style you like best. We do also build catamaran water taxi that have high tunnels for rough seas.

These vessels can be outfitted with diesel and jets our the least expensive would outboards. –

The layout can be changed around as you like.

Also, you could have a bow gate/lander for beach boarding or diving.

Regards
Charlie Crane
