[Brand New Windowfarms- Vertical Food Gardens](#)

by The Windowfarms Project

 Category Food

 Location Brooklyn, NY

Home and garden

You don't need a green thumb to grow your own food. Windowfarms are easy-to-use hydroponic gardens that let you cultivate fresh veggies right in your home. Keep it simple with salad greens and herbs, or go big with strawberries, cherry tomatoes, and peppers. Whichever you choose, though, you'll be well on your way to a truly homegrown meal to share with friends and family.

Printrbot: Your First 3D Printer

Printrbot: Your First 3D Printer

by Brook Drumm

 Category Open Hardware

 Location Lincoln, CA

A little 3D

While the 3D printing revolution has made it possible for anyone to design and print their own objects, most existing printer kits can be a bit intimidating. Enter Printrbot, a compact 3D printer designed especially for kids and beginners. By eliminating soldering and simplifying the build process, Printrbot is an affordable, accessible machine that will have you ready to 3D print in no time.

The Unfolding Tree

The Unfolding Tree

by Leilani

 Category Product Design

 Location Los Angeles, CA

Tree of life

The Pop Tree begins life as an inconspicuous piece of chipboard, but unfold its laser-cut edges, pop out its snowflake-printed branches, and boom: a simple, modern ode to the Christmas tree that still makes you feel all warm 'n' fuzzy inside. Best of all, the Pop Tree's designers are working like elves in the North Pole (of Los Angeles) to get you these babies in time for Christmas!
