looking forward to seeing you.. to give you a head start, my funding is now concentrated on 1 decoding and evolution.. (there are no energy equations in predator prey models.),2 . music and the brain.. its ability to bypass conscious processes , rhythm tempo harmonics made in the brain NOT as a result of music. 3 psycho active drugs. close relatives of serotonin and dopamine, naturally occurring, artificial, . used as tools to probe the mind, not the brain. 4 computational chemistry.. Labs should be eventually obsolete. , the wet work like aerodynamic modeling should be done inside the computer. , like stress analysis in the old days , simply seeing how much weight something could take until it breaks versus the stress calculations.
