I understand, Carlos suggested just to use carbon fiber as front panel to locate new gauge clusters,,I thought is was easy to drill into and would be water resistant.

Do you think stained or painted ply wood is acceptable as face plate for panel? Or other material choices?
-note: the dealer in St. Thomas has our 30K deposit for Suzuki engines, should we recover money or just stand by?

Thank you,

Larry

That should be a sample to use as a dash board for [REDACTED] console, there are more holes in panel than needed. That is what [REDACTED] used on old midnight expressed panel to cover old hole.

I have not seen sample yet.
