Dear Jeffrey

It's not that easy to make your project clear for everybody.

Plant and us have worked a lot on the Dining Room, the Main Hall, your Steam room, now the request is on the Master Bathroom...

With all due respect , we have spent days and weeks with Plant, who are nice people, recommended by suppliers and interior designers we know in NY.

If you think they are too expensive I do understand.

We have always try to help and give the best quality service to you and as usual for all our clients the goal was to have an happy and perfect result.

In this case, we are suggesting you to only finish the umbrella and do the decorative painting in the dome of your master bathroom.

As these two points are the most decorative ones and the less technical.

You will understand that the new steam room's area is much too complicated to take the risk to do it badly with the wrong company.

It is very technical to build perfectly the waterproofing, the humidity level, the water pressure, the waterproof lighting and so on.

You always have been a nice client and partner and from my side a "friend" I should dare to tell but there is a moment I cannot follow you.

I will finish the Umbrella room as soon as the carpet will be installed and you will tell me when your bathroom could be free for the décor on the ceiling (one month will be needed).

I hope you will understand.

With my best regards

jean
