Dear Youssef,

Many thanks for your reply and I agree on the absence of peace from the agenda...

You made a very good point here that indeed might cause an issue. I didn't think of it... I don't know what [REDACTED] story about me (I've heard different versions of it and they all unfair) to the management but it is very sad how the whole misunderstanding has turned out, feels almost toxic.

I very much appreciate your thoughts and advice, which I'll follow indefinitely.

Sincerely,

[REDACTED]

Dear ,

Thank you for sharing this with me. It sounds like a very timely conference on an issue that is close to our heart, although peace nowhere features as a theme, just security.... Given the enmity between you and , I am not sure asking Adam to send you to represent IPI will fly. What I would however suggest is that you bring this conference to his attention and say it would be good if IPI could send someone to attend.

Sincerely

Youssef

Good morning Youssef,

Hope all is well.

Masooma saw and kindly share this with me.

https://www.youthop.com/conferences/1st-international-conference-water-security-2018-canada?ref=browse_page

The deadline for an abstract if you want to be a speaker and present your work/ideas has, unfortunately, passed but the registration to participate at the conference is still open.

If you follow the link to actual web of the event, there are listed topics which will be discussed. Some of them are very interesting and, perhaps, could be useful for our water diplomacy program.

Plus, Canada is pretty close but the only thing that bothers me is the price of the ticket... I would have loved to go to this conference representing IPI, could be a great opportunity for networking and bringing some fresh ideas... Do you think I should still try and suggest to Adam?

Sincerely,

[Redacted]
