itis not apple compatible , nor simple nor new nor great. i do not need a converter , as you can read the most of the controls are infrared.

I left a print-out for your review on you desk yesterday.

The plan as of now is this crestron system you are setting up now at lsj..as I was told by John and Nick????.. I will send you a link to the hardware I would like you to consider for the club 54 room @ 71st

I also need your input on weather the crestron system is what you want @ 71st

I reviewed allot of hardware and I am submitting for your one that is the best sounding audio converter around. And is built for MACS

[REDACTED]

***IR Remote for LIO-8/ULN-8**

We have a special treat for LIO-8 and ULN-8 users; your front panel has an infrared receiver installed, and v5.4 activates it.

You can map the buttons from your Apple remote (or any other compatible remote) to control many elements of the LIO-8 and ULN-8 front panels.

With the new Infrared remote support, you can control input and output gains, control modes and the Monitor Controller level and mute from across the room, without even having a computer attached. If your computer is attached and MIO Console is running, you can even select the Monitor Control input source and output destination.

Follow the links below to see more new features...
