Subject: Leak repair at Zorro & BMS Monitoring System
To: darrenindike <[REDACTED]>, jeffrey Epstein <jeevacation@gmail.com>

Mr. Epstein & Darren The leak repair at Zorro is complete the plumber fixed the problem last night. I also had Monolito put the main house humidification back on line to assure proper humidification at the house ,as you know the repaired line was the main water feed to the humidification system. I recommend you also need to train someone physically at the property on the HVAC BMS monitoring system to assure the property of the proper alarm or system failure notification and response, right now Brice Gordon is the only person that has access to the system and being on LSJ most of the time and busy with all the Island management makes it harded to keep a proper watch on the equipment.It is very important with the extreme outside cold weather and normally low humidity levels to also be monitored on the ranch. Thanks Richard.
