the wall should step downs until near building we decide on parking - road and how far out it goes across from building, again these photos are not really helpful there needs to be man taken around and across from the building,, gary you should know better,, this is how we got in trouble in the main house pool

any direction on this

we could start at the col. and work east ,its pretty clear what alignment works til we get to where the first stair starts.

do you want to match the stepping of the existing wall or follow grade like the outside road wall

Jeffrey

I ran parallel from the columns to the point the building starts to turn south. Then two lines connect to the east wall. any thoughts as to which line?

if this looks generally correct I can drive some stakes and run ribbon to give the pic's more definition in new pic's

Greetings Mr. Epstein,

Photographs of the Helicopter wall markout for your review and comments.

Respectfully submitted,

Daphne
