flush,, and please provide hardscape.. the shade structure on left ,, unfortunaley does not work on site, you are forced to look at ugly rocks. face south. , so i chose to replace it with landscape.. Unfortualtey though I said from the begining that attempting to design this project from your offices would be virtulaly impossible these things reinforce that postion.. like the main house, where the roads terrace are still in the same stage from christmas , is holding up the project.

Jeffrey and Gary,

Are there any comments on the flagpole pool drawings I sent last week? I still need to know the following, so we can finish these drawings:

- How far do you want to shift the new north and south walls away from the shade structures?
- What are our options for the coral stone paving or other materials? Is it just 16"x16" or smaller? Can we get larger sizes? We need to be able to have some larger pattern sizes, or it all looks too uniform even with pattern direction changes.
- Attached are images of the shade structures flush with the deck, and raised 6" as requested. Which do you want to go with?

Thanks,

Warwick
