Not sure yet - Tom and I are discussing a few ideas:

- Keep the field coral stone, and use a different stone for the carpets, borders and other accents.
- Larger coral stone for the diagonal field (24x24 or larger).
- Alternate material/stone for the field (but I do not think colored/stained concrete would be appropriate).

I just want to make sure we understand the parameters. For example, if it all has to be made out of 16x16 coral stone. We are working on patterns using smaller cut pieces – 8x8's, 8x16's, 12x12's – for the accents.

My main concern is that could be a lot of deck area to cover, and 16x16 may be too fussy for the main field (not the carpets or accents). Attached is a view of the old pool deck. I do not think it would stand out of some of that was turned at a 45 degree angle. See also attached paving at entry to the garden, where there are two angles...

16x16 is our stock in coral
the rugs typically in the main compound are cutting to 8x16 and doing a double border and diagonal 16x16 field within the borders
Jeffrey could see maby some 12x12 satillo tile or the 6x6 blue waterline tile as a accent/border component in the deck as well

flush,, and please provide hardscape.. the shade structure on left ,, unfortunaley does not work on site, you are forced to look at ugly rocks. face south. , so i chose to replace it with landscape.. Unfortualtey though I said from the begining that attempting to design this project from your offices would be virtulaly impossible these things reinforce that postion.. like the main house, where the roads terrace are still in the same stage from christmas , is holding up the project.

Jeffrey and Gary,

Are there any comments on the flagpole pool drawings I sent last week? I still need to know the following, so we can finish these drawings:

- How far do you want to shift the new north and south walls away from the shade structures?
- What are our options for the coral stone paving or other materials? Is it just 16"x16" or smaller? Can we get larger sizes? We need to be able to have some larger pattern sizes, or it all looks too uniform even with pattern direction changes.
- Attached are images of the shade structures flush with the deck, and raised 6" as requested. Which do you want to go with?

Thanks,
Warwick
