---

Hi Jeffrey,

Attached are all of the photos that our photographer took contained in one PDF file. This will allow you to delete any that you may not want to forward.

We are hoping to have a very cool video available within the next 7-10 days that we will be able to email to any interested parties.

I will also make contact with the President of the Ivory Coast and make him aware of the availability for sale of the 727 that he may be chartering in the next few weeks.

GIV-SP SN 1381 is en route to the United States; however, it is apparently still sitting in Europe with the Sheikh and his family as passengers awaiting authorization to enter U.S. airspace. These delays appear to be hurricane related.

I welcome discussing any of this with you in more detail.

Best Regards,

Don Bass
