Good evening All,

In speaking with Bryan Electric and WAPA, we have decided it's best to schedule the work for LSJ for Thursday and Friday. This way schedules can be clear to address any issues that can possibly arise. Additionally WAPA has some work taking place on generation and this will give them a chance to accept any load available. Please prepare for Bryan Electric personnel to travel first this Thursday morning.

Thanks,

HH

The splices and terminations were ordered and were expected earlier this week. The assumption is the holiday mail created a delay. With that said, we expect them any day now as they were supposed to be 2 day delivery. As soon as they arrive Bryan Electric will go to LSJ and repair the cable. Once the cable is repaired we will immediately energize the cable. We will then wait 24 hours and then proceed to bring LSJ back on WAPA power.

Hugo can you please update me on Denny and splicing. I understand materials are not yet there? Also once splicing is completed what else is needed for power to be back on?

located a prefab man hole its 6000.00 dollars from island roads the only game in town plus I need to get transportation

On Wednesday, December 27, 2017 8:05 AM, Hugo Hodge <[REDACTED]> wrote:

Danny was relentless in trying to locate the pre-fab box yesterday but Boxing Day is a widely observed holiday down here.

He will make the same effort this morning.

As it is located he will make arrangements to have it delivered and we will complete the splice and get back on the grid.
