I included both the mouse & trackpads in all configurations, I don't know if he hates the trackpads, but the space grey accessories aren't sold separately.

None of his systems use more than 1TB of data, so a 2TB SSD should be great.

Would really like to send empty boxes to houses and have the old machines shipped here to manage the migrations.

█ like to get all the houses to have NAS time capsule backups as well, so the next PB type accident doesn't wipeout the data / we can ship the NAS' instead of machines in the future (for upgrades & data recovery).

Dear Richard,

Good morning. I just noticed that the [apple.com](http://apple.com) website was updated for iMac Pro. Now shows 12/14 date. Do you have particular specs that you are looking for? I can make note of this in your profile and as soon as we have part numbers or know what in store availability/ordering will look like I can connect with you.

All the best,

Mark
