dugan controls advanced researcj,, iarpa the internet version is run by another smart women , but NSA is mllitary and mathematics.. WE did not understand how the planets moved until Kepler found one simple algorithm to describe virtually all planetary motion. we should with todays supercomputers,, ( wavelet analysis, and ellipitacal logarithms ) be able to decipher all signals from which face does not belong in the crowd( already being done ) to which cell has metastazied to the breast. [REDACTED] said I would meet Regina at Ted . We should torture her together,, I also know she is thinking of leaving. ( not through [REDACTED] )

Very cool. [REDACTED] Based in Japan, broke code of Soviet navy in Vlad after Korea. He had to do it by using his brain to see and hear patterns.

**Subject:** Re: RE:

think of communication between cells in the body made up of proteins,, they are merey signals that we cannot yet decode NSA decodes signals .. in many languages and math forms.. the aloritjms should be tested against biologically generated signals. it is very clever and I promise a leap in brain understanding

ask her if we can nsa code breaking ( signal processing) to work on brain actintiy and intracelluar deception.
