Mr. Epstein I called Scott and spoke to him he does not want to use e-Home that I recommended to check the 6th floor projector problem. He said he will contact you by e-mail to discuss the repair .He also said he will be working out of town for the next week or two.

I also walked through the bed room stair case and checked all the scratched wood work that needs to be touched up . In the past i brought in Dominik the decorative painter to give a proposal for the repair of the 2nd , 3rd floor and bed room stair case wood work scratches nicks & dents. I will have him look at all the wood work again with all the additional scratches and have him give a new proposal for the repair. I used scratch cover on all the fine scratches in the wood to make it look better until a permanent repair can be made. I am currently working on the to do list and forward to you as soon as possible. I will check all audio, computer , apple wireless ,lamp cords and hide all visible wires and make sure their is no clutter before your return .Thanks Richard

Good afternoon Mr. Epstein I am just following up on the 6th fl movie room theater system the last time Scott Dennett was at the house he check the apple tv on the 6th fl theater and found the sony projector not working . Scott said he was going to report it to you and felt it was time for you to change the projector out . I checked the system out my self and could not get it to play DVD's or apple tv the projector lens does not open. I also checked all electrical breakers that feed the equipment and found all breakers normal. I did not hear anything else about the projector being replaced or see any repair technician scheduled to check the projector and system out. Do I call Nick Lambrose back ?or should I call a local company to see if the projector can be fixed. I asked around and have a number for a company called E -Home at [REDACTED] [REDACTED] Would you like me to call them in to check this , or how would you like to proceed .Thanks Richard
