Jeffrey,

Boeing should be return to service with fwd AUX fuel tank repaired by 2pm tomorrow,. need to replace one boost pump in Fwd aux tank which controls the transfer valve,. located pump in Miami,. all should be fine with B727 and ready to go,.I will update you regarding Gulfstream at noon tomorrow,.

I will ask your approval before departing in Boeing tomorrow,.would like to reposition to New York and prepare for trip Friday 8:30pm departure.

I have researched New York fuel prices, the best deal I found is \$4.75 at Steward Newburg NY airport near White Plains, I could set up AAG Helicopter if you like?., Newark fuel price negotiated is \$6.33, I will check Islip and Farmingdale for good fuel price also,.

thanks,
Larry
