I don't know. I am physically unable to function. My sleeping is a problem I can't fix and I don't know if it is a cause or symptom. Even when I am awake, I am extremely foggy, tired and just can't do anything or think clearly. I have to cancel most appointments and barely manage to leave my apartment for basic errands. My hair is falling out, my teeth hurt and my eyes are constantly red. Today is the first day I feel ok in over a month.

I actually started to keep a sleep log and it's so weird I don't know what to think of it... It looks like a lot of sleep at the wrong times, I should not be this exhausted

sat - 8am - 6pm
