Jeffrey

Attached for your review is the revised proposal from Aspen Landscaping, Plant Material price comparison and photos.

The plant material is based upon the direction you gave during your last visit.

Also attached is plant material pricing comparisons from two local companies in ABQ

Jericho Nursery plant material was of a very high standard, compared to Plant World which I thought was average.

Please note that each plant will require a new drip line to it hence the cost for irrigation.

Zorro Ranch will provide top soil, at least 4 dump truck loads and Aspen will provided the fertilizer etc to add to mix.

All the beds that have been cleared of plant material will need to have 12 to 18 inches of soil removed first and then new amend topsoil added mix added.

Pecan mulch will be applied at the end to finish off.

Rich has yet to review
