A limited number of tickets will be available at the door.

Join famed neurologist **Oliver Sacks** and award-winning journalist **John Hockenberry** as they discuss Sacks' latest book, which explores the bewitching and surreal world of hallucinations.

This webcast will canvass the rich cultural history and contemporary science of the hallucinatory experience, and will also touch on Sacks' own early psychedelic forays that helped convince him to dedicate his life to neurology and to write about the myriad riddles of the human mind.

*Thank you to **The Cooper Union** for hosting this inaugural event in our Science & Story series.*
