Jeffrey

Gulfstream is changing a BUSS controller and a Relay to repair the Stall warning system, took a while to figure it out with Tech Support assistance,
Parts will arrive today,, should be finished installing late tonight.,

As you seen in the photos, most the Interior is removed from the G550, I wanted you aware in case you wanted to view the New Veneer inside the plane.

Do you still plan to visit Savannah on Mon or Tue?

Thx,
Larry
