Thorbjøn Jagland 7:26 AM (7 minutes ago)

to me

The best date is 27. I will always re arrange my schedule for you , however i am meeting the two ministers you suggested on the 25 th and want to devote the full day to you when you come. Your economic predictions have once again proven correct . I don't know how you do it. Please teach me. I would hope that on the 27th ,you will make time to share with us your views on the future on the euro.

You said that Boris asked for more information about the invitation to the "The world Forum for Democracy" in Strasbourg, that I had sent.

This is a new thing. the first edition was last year. Ban Ki Moon opened it together with Nobel Peace Prize Leurate Tawakol Karman. 1500 people were present, political leaders from many parts of the world together with academics, media, NGOactivits and business professionals.

This year we will focus on the need to reconnect citizens to representative institutions and new ways of governance at he local, national as well as at the global level. We want to promote new promising voices and new forces. And Bill Gates represents boths.

He has said: "if we are going to change peoples lives, we need another level of innovation. Not just technology innovation - system innovation" I have also seen him saying that he is promoting innovative ideas that could help remove barriers: new techniques to help farmers in developing countries grow more food and earn more money, new tools to prevent and treat deadly disease, new methods to help students and teachers in the classroom."

This could be his theme at the opening session of the Forum with a wonderful opportunity also to speak about his work to combat diseases in the third world which I see as a very important contribution to new global governance in order to combat powerty and promote peace. Innvolvement of private sector is important in that respect, as Sec Gen. Koffi Annan spoke about in the millenium speech.

The opening session will be around 1100 h on the 28 November. The President of France, Francois Hollande, will also speak at the opening session. He is promoting innovative financing as a way of combating poverty.

The Council og Europe is the oldest of the European institutions set up to protect human rights and rule of law on the entire continent with a huge machinery of monitoring bodies, expertise on lawmaking and constitutional matters and on top of this pyramide The Court of Human Rights to which 800 million people in Europa can petition.

It could be intresting for him to know that an important institution within The Council of Europe is European Pharmacopoeia.

Its mission is based on a convention which is binding for all the 47 states, contributing to basic human right of access to good quality medicines by establishing and providing official standards for manufacture of medicines and by ensuring the application of these official standards to substances used in the production of medicines and co-ordinating a network of Official Medicines Control Laboratories. 500 people are employed in this institution

and could be a could example for other parts of the world that wants to building institutions for providing people with safe medicines.
