Greetings Mr. Epstein,

Mr. Rover of Greentech Construction Systems has attached a digital pamphlet of their work. For your review and comments.

Respectfully,

Daphne

Dear Ms. Wallace:

The pleasure was mine, and we look forward to assist you.

As I mentioned to you, we are not only builders of green and prefab technology, but also Architects licensed in the USVI, and we also do Design- Build projects, which encompasses the whole package for clients with peace of mind.

My partner and I are planning to go to St Thomas probably next week, and we could meet with you and everyone involved in the project.

If you still do not have a design, we could assist you. We would like to understand more, why you are choosing to do what seems to be a large gazebo, in a prefab concrete structure, in view that we could do it in another system, also in concrete, strong, and fast to assemble. We will give you a call tomorrow around mid day to discuss.

Please find below our web page for our architectural work and a small digital pamphlet with the following link:

Greetings Mr. Rover,

It was really nice speaking with you this afternoon. I am looking forward to learning more about your company, Greentech Construction Systems, and hope that this is a project that you will be able to do for us.

Attached is a digital image of the building that my Principle is interested in having constructed out of prefab concrete. The building would be 30 ft by 60 ft.

Please feel free to call or email as you need further information.

Kind regards, Daphne
