**Importance:** Normal

---

Hi Darren to bring the electrical supply to the fixtures this requires the electrician mounting the transformers for the fixtures on the opposite side of the wall in the oval office gift closet and the security room drilling through the wall behind the screens and mounting the new fixtures and running new electric service for the transformers. This is the lighting designers contractor who also does a lot of work at the Lutnick residence next door. The electrician said he has at least 5 days of work and would like to start Wednesday June 19th. Please advise if you would like to move forward with the project. RB

Is this approximately \$7,000 to install two picture lights? Isn't that high?

Mr Epstein here is the electrical work proposal and small switching system for the picture light installation. I will schedule the removal of the silk screens with a art hanging company and get a proposal for a new frame to mount the silk screens over the picture light installation after the electrical proposals are approved. Richard B.

Attached please find the quotes for the electrical work, and for the small switching system to easily turn both lights on at the same time.
