trees take longer . keeping one part healthy , might rob the system of energy . complex systems are not usually amenable to a single parameter fix. especailly over a long time. . views?

some closely related species succumb to this entropy 10 times faster than others
some organs in the same body 10 times faster than others
some cells in our bodies escape it all together -- there is mysterious act of cleansing
of all that "entropy" when two old cells fuse to make a new organism ...
I think we can get a handle on it and reign it in and we are not far from it.

thanks.

A complicated subject. I am happy to engage in debate next time you are in Boston.
There is a golden point somewhere between two absurds
- let's not change anything it's created perfect
- let's tailor the universe to our needs

In any case I want to give people more time to play, and to dye healthy, once ready.
I also want to understand what is aging ... noone knows.

L.P.

sorry about dad, great article. . not sure why anti age, is a good thing. a complex system i believe as part of an ecology. would be dangerous to the system so i would be there are many redundancies to make sure people die . at the same age as they did during the bible. . max 2 to the eight. foldings.
:)

If you excuse a bit of self-advertisement, I think it is a nice read.

This reporter was surprisingly pleasant to work with contrary to many previous experiences ...
