i think the payoff matrix needs to be rethought. if we are in a game , and i cooperate, it is not me that gets the benefit. it is the combination of me and my cooperater. / a new group. not necessarily reducible into me and you. A cooperates with B. it is "AB" that is now the beneficiary. a new entity, it might not be a reciprocal group. it could be parasttic, it could be toxic in the future , I think we need to do more on what cooperation entails. time . cost to each, message it sends to environment. . change in surface area of combined, etc.

i agree. i think this goes toward the cooperative game theory i am trying to construct.  
i am very much looking forward to seeing you at the ranch!!

when two entities communicate, do they automaticallly make a third. the combination. I think now that we are not what we eat but we are what we consume, including all types of inputs. sensory, etc. I think that the environment contains communications , and that interaction effects everythingk more when i see you
