Good morning Larry,

ABC carpet does not have a matching carpet that can be used for the side ducts and seat bases.

We looked exhausted our sample library and do not have a coordinating carpet that is ready available.

Can you please identify the coordinating carpet that was installed in your GIIB ? This carpet would be identified in a log book entry.

I believe it is prudent to make sure we find a coordinating carpet BEFORE we order the floor area carpet from ABC.

Thank you.
