yes

On Wed, Sep 25, 2013 at 6:27 PM, Jermaine Ruan <[REDACTED]> wrote:

Good day boss,

Tony Shepherd and colleagues from Choice Communications made their assessment of the LSJ.

Internet bandwidth

- Located three potential sites (in order of quality of service):
 - 5 Palms roof
 - Next to the Berm facing Great St. James
 - Mechanical Building Roof
- They would like to set up a test service link (15MB) to see if the speed and quality meets your approval.
- If you approve the estimated rates are \$130 per dedicated 1MB (-approximately \$1950 for 15MB vs our exiting ATT \$2,329.85 for 4MB).
- They are willing to start as soon as you choose a location.

Cell Signal

- Tony stated that Choice may have a solution that would work. They will outline their proposal for your review.
- If you approve their solution, Choice would be using the proposed tower to mount their repeaters in addition to the signal booster for LSJ. Because the site would improve Choice's signal service to St. John, they are willing to revisit the above mentioned internet rate and possibly offer you a reduced rate.

Regards

JRuan
