Hello Richard,

Wiring from the projector to the equipment rack could possibly take two men a full day and may require cutting holes in the ceiling. I cannot absorb that cost. If you like I will requote with the worst case scenario providing ample cost for rewiring. Patching and painting will not be included.

We were not involved in the original installation and have no knowledge of the existing wiring pathway/conduit. If there is a conduit in place and the wires can easily be pulled through then that would mitigate the scenario above. It would still require additional time.

Thank you,  
Al

thank you for explanation  
boss will proceed with turn key solution but will not pay for additional wiring costs..  
i believe your quote has enough cushions to absorb wiring costs..  
please let me know how you want to proceed

thanks

Hello Rich and Merwin,

Basically that means that if there is a problem with the wiring to the projector then that work is additional. It can be by another vendor or by Clarity for an additional fee.

I hope this helps.

Al

Hello Richard,

Pending the availability of the receiver we can start immediately, possible Wednesday or Thursday. Someone removed all of the Crestron equipment but we did include programming for the URC-MX-980 remote control. All cable are 4K compliant.

Note: We do not know that integrity of the cable from the processor to the projector. We will bring enough cable for and external (testing/temporary) set up should the existing in wall/ceiling fail.

Thank you.

Al

A few questions:

- 1) how soon can you install
- 2) please confirm labor includes crestron programming.
- 3) please confirm all cables are included for 4K

Sorry. A bunch of stuff just overwhelmed us. I will have it on your desk first thing Monday. I may send it out over the weekend but that may not be much of a help.
