Jeffrey

Roche agreed to buy FMI for \$137/share in cash.

Currently it is trading at \$136.50. Let me know what you would like to do.

I am very sorry for not checking with you prior to selling part of the position.

As a follow up to our meeting last night I will come back with an action item on all the remaining equity positions. If my report card is going to be based on the \$9mm then I would rather liquidate everything else unless you specifically wanted to keep certain positions.

I would continue to manager the fixed income portfolio as I am currently doing.

Paul
