Subject: Proposal from the University of the Virgin Islands: "Transforming STEM Education in the US Virgin Islands"

Dear Cecile,

Greetings from UVI! We are especially encouraged by Mr. Epstein's willingness to become engaged with the University and support our mission.

During our meeting, he asked for our Science and Mathematics faculty to provide a wish list that would substantively transform their efforts to provide quality science education to our students. To that end, I am sharing a draft proposal and budget for your review in advance of Mr. Epstein's consideration. As you will see, much of what we originally discussed back in 2012 is still contained within this new document. However, it has been updated with new input and perspectives.

I will call you early next week to confirm receipt and schedule a time for us to discuss in detail. In the interim, please feel free to revert with any questions and/or suggestions by phone ([REDACTED] [REDACTED]) or return email.

Looking forward to working with you on this project once again!

My best,

Dionne
