No news on timing. We are waiting for the entrance documents.
Can you send the recordings as per my e-mail dd. 14 Feb?

Best regards
Adam Zykowski

Regarding the travel plans, we are applying for entrance visa to USA, this might take approx. 20 working days.

Maybe I will come myself - I need to renew my Canadian passport.

In the meantime, we are still investigating the open issues, and have contacted an experienced sound surveyor from a technical university and independent sound research center.

Please supply us with some sound recording made by a professional/semi-professional microphone or at least a PC with e.g. Windows Recorder:

1. In four different places:

a. in the bow compartment of the cabin

b. in the middle of cabin

c. outside the cabin

d. in the middle of cabin after making a simple foam sheet curtain (fixed with tape) of the entrance to the bow

2. Please send a video of boat while cruising (better to record from another boat which is cruising next to the Sportis)

3. Engines can be in standard regulated up/down on bolts. Please inform what is the still possible regulation (how many bolts up/down can be adjusted) in this particular case

P.S. I do have good news on the baby front!

Since last Friday (7th Feb) I am the father of small Peter.

My wife had some small complications during giving birth, however finally everything went fine and they both feel good.

Best regards

Adam Zygowski

Dear Rich,

We understand your concerns, and due to the fact that we had not experienced such boat behavior before, we are checking with all experienced designers the potential problem.

We have undertaken several consultations which will give some suggestion in the coming few days.

Regarding the visit, as I mentioned due to family matters I cannot come personally.

I discussed this matter with my father, the chairman of the company, and he is planning to visit you.

Maybe with one more person.

We checked the route, the fastest takes 30 hours one way...

Gdansk - Amsterdam - NY (or Atlanta) - St Thomas

Additionally the visitors will probably need a entrance visa to USA - this takes a few weeks.

I ensure you that we are willing to solve this matter asap.

If possible, please send a video of the boat making noise when standing (not cruising).

Best regards

Adam Zykowski

Dnia 03-02-2014 o 16:40:41 Richard Kahn <[REDACTED]> napisal(a):

I do not think you are understanding our concerns. We believe that this particular boat is the issue. We have had ten different people including customs agents, all agree that there is something dramatically wrong.

That is why we would like you or someone from your company to see boat immediately.

Please let me know when this can occur as Mr. Epstein said he would pay for your travel expenses.

Thank you.

both the island personnel and mr epstein have had many cabin ribs over the years. this is nothing like anything either mr esptein or his experienced crew have ever heard . It is virtually impossible to drive it without head phones on and the pounding is extraordinary. the boat today is useless to both mr esptein and his island. it is not merely the sound but the pounding of the boat as it moves through the seas.

Dear Rich,

Following our phone discussion with Mr. Epstein, I would like to inform that before we send somebody to USVI, we ask you to carry out the following activities:

1. Please send a picture of the boat laying on the water taken from the side - so we see the trim of the boat
2. Please check if the bilge plug (in the lowest point of the transom) is correctly fitted - that there is no water ingress
3. As I understood, the boat is making noise even when it is not cruising?
4. I also understood that you had covered the entrance to the bow compartment in order to check if the sound difference?
5. Please send the model of Yamaha engines mounted on the boat

If the video's sent by you few days ago give the actual sound reception, then this sound is not untypical for a RIB cabin boat.

However in order to soundproof the cabin, we suggest to cover the place where you stand in the bow compartment with a foam block and additionally mount a door at the entrance.

Best regards

Adam Zygowski
