Good Evening All

As of today, Earl has reported that the few flash floods we had has hampered his crew a great deal. He has not been able to send anyone this week. He is in the process of reorganizing everyone's schedules to include LSJ. I will report on the new time frame for LSJ tomorrow.

A bit of good news is that STC is online. Liston got BroadbandVI up and running this afternoon. I will monitor the QoS (quality of service). But so far (see attached snap shots readings from the Google WiFi) It is looking stable.

If VIYA is time frame is not adequate. I can ask Liston to get Broadband to provide service to LSJ while VIYA gets online.

Regards  
Jruan
