Terrence cannot follow thru with anything..
FCC application still not competed by him (and his vendor) nor has he provided EDC certificate
Please advise

Good evening,
The paper work wasn't ready had to wait for Choice Data sheet. As far as the pricing on the remainder of equipment. I was waiting on the manager to come back to work, because I was told that I have to pay for the others up front since I'm behind in my payment plan. I will have a full update for you by Thursday COB. Sorry for the delay.

PS
I should also have the EDC certificate in my person.

Regards,
Terrence Rabsatt

Good day Sir,

Here's the bandwidth usage chart. Choice has left your pipe open for 2 months now and your maxing out the link steady. That's 25 megs, you also have the others on the island complaining about the slow speed, which would be Anna and in the captain room. I would recommend going to 60 megs to alleviate the bottle necks. I have recommended a intranet/Internet network along with recommendation from Jermaine on what the office and LSJ needs. This will work as follows: you will have a 25 meg pipe intranet between LSJ and STC. You will have a dedicated 50 meg Internet pipe to LSJ and a 10 meg dedicated Internet pipe to STC. This helps both sides as in the event the STC needs more than 10 megs it can use it from the slotted 50 megs for LSJ and this works vice versa. As STC is closed at nights and some weekends, that 10 megs if needed can be used on LSJ.
