Richard,

The Engineering Assessment for the Little St. James SWRO plant is attached. We are still working on a proposal that outlines some different O&M options for you and that should follow in 7-10 days. Please let me know if you have any questions regarding this assessment. Thank you.

Mr. Kahn:

We appreciate your patience with this; the confluence of the end of our USVI project and the holiday interruption (Thanksgiving in the US) have taken their toll on our available resources

We will have the report to you on Thursday the 4th

Please feel free to contact me directly should you have any questions

Chip Harris

Good morning Richard,

Friday's visit went well. We were able to document all needed plant data and its current overall condition. Michael will include the condition of the SW intake piping and SW intake pump system as well as the RO plant for review.

We are completing a new installation this week on St. Thomas, so Michael will not be able to work on his report until after this job is completed. He committed to having the completed engineering report to you the first week of December.

Regards,

Patrick Adams
